

For Success in the treatment of **bacterial Infection**

Acute otitis media, tonsillitis and pharyngitis

Vildox CV 100 Dry Syrup

Cefpodoxime 100mg & Potassium Clavulanate 62.5mg

Cefpodoxime :

- Ideal switch over from IV Ceftriaxone in serious RTI.
- Ensure high efficacy in tough infections.
- Drug of choice for single dosage of gonococcal urethritis (Harrison's principal of internal medicine in Ed vol.1,pg.875)

Clavulanic Acid :

- Extends spectrum of cefpodoxime against beta lactamase strains

Compare sensitivity of amoxy-clav & cefpodoxime - clav among beta-lactamase positive clinical isolates of gram-positive and gram-negative pathogens.

Cefpodoxime- Clavulanic acid appears well suited for use in the treatment of a variety of healthcare associated infections.

(J Indian Med Assoc. 2008 Aug; 106 (8):545-548)

**Urinary Tract Infections | Bronchitis
Gonorrhoea | Pneumonia**

Trusted Combination Against Resistant Spores....
