

Ferywin™

Iron Sucrose 5ml

Injection

**In Iron Deficiency Prescribe...
The Best Choice**

- Replenishes tissue iron stores, reverses iron depletion & iron-deficient erythropoietin & corrects or prevent iron deficiency anaemia
- Can be safely administered to haemodialysis patients in tolerant to other iv iron products
- Can be administered without a test dose
- In four US clinical trials in hemodialysis-dependent chronic kidney disease patients, a total of 130 patients who were in tolerant to other IV iron products (100 in tolerant to iron dextran & one, in tolerant to Ferric Gluconate alone, 15 in tolerant to both) were successfully treated with iron Sucrose
