

WinOvulation™

FOLYTURE™ PLUS TABLETS

L-Methylfolate 1mg + Methylcobalamin 1500mcg + Pyridoxine Tablets

Adding Values In Your Memorable Moments

Methylcobalamin{vitaminB12}

- Is a more bio available form and a crucial nutrient for fetal development.
- It is essential for its role in DNA and methionine synthase which is an essential amino acid.
- Keeps nerves and red blood cells healthy.
- Is utilised much more efficiently by the body than cyanocobalamin

Lmethylfolate{LMF}

- Is primary active form of folic acid and with high bioavailability.
- Reduces incidence of low birth weight.
- Assures the optimal folate levels for conception in women where failure rates are very high

Pyridoxine Phosphate

- Is the active form of vitamin B6.
- Helps reduce the symptoms of morning sickness.
- Has the ability to lower levels of homocysteine in the body

Making dreams come true
