

EYEXCEL[®]

OLAMIRK

5 ML

Eye Drops

Olopatadine 0.1% + Hydrochloride Eye Drops

- Effectively reduces the signs & symptoms of allergic conjunctivitis with a rapid prolonged duration of action.
- Clinically superior to the other anti-allergic agents because of its strong antihistamine effect.
- More efficacious than loteprednol in reducing the acute signs & symptoms of sac & appears to be better tolerated.
