

LOTION

**Strong Response
Against Mites**

Permetic Plus Lotion

Permethrin I.P. 5%w/v + Cetrime I.P. 0.01%w/v

PERMETHRIN

- A topical scabidical agent.
- Highly safe as it is minimally absorbed via skin (only up to 0.5%).
- Preferred choice for scabies due to its residual effects.
- Has very low Mammalia toxicity & does not have any safety implications for host.
- Is the first line treatment for scabies.
- In the treatment of scabies permethrin is more effective than gamma- benzene hexachloride & ivermectin.

CETRIMIDE

- Achieves eradication of bacteria in 1 minute.
- Effective in inhibiting bacteria.

SCABIES | CORPORIS | HAIR LICE |
PEDICULOSIS PUBIS
