

TIMOCEL B

5 ML

Eye Drops

Timolol Maleate 0.5% w/v + Brimonidine 2% w/v Eye Drop

- ⌘ The fixed **Brimonidone- Timolol** combination effectively reduced intra ocular pressure 6, 12, 24 hours after phacoemulsification cataract surgery
- ⌘ Reductions from baseline in mean diurnal IOP nad morning IOP were greater with **brimonidine- Timolol** fixed combination than with dorzolamide timolol fixed combination
- ⌘ **Brimonidone & Timolol** is a safe and effective IOP lowering agent for POAG and ocular hypertension
- ⌘ **Brimonidone** provides neuroprotective action and thus prevents further loss of vision

* Relieves pressure, Restores relief *

In elevated
IOP

INDICATIONS
