

# TOBRACEL<sup>TM</sup> FML

5 ML

Eye Drops

Tobramycin Sulphate 0.3% w/v + Flurometholone 0.1% w/v Eye Drops

## **Tobramycin**

- Highly active against staphylococci, S aureus and S. epidemidis including penicillin-resistant strains
- Exhibits rapid penetration into the aqueous humour
- Highly effective in controlling both superficial and deep infections
- Possesses superior safety profile compared to gentamicin

## **Fluorometholone**

- Inhibits the edema, fibrin deposition, capillary dilation & scar formation associated with inflammation.
- Safe for long term use

\* Dependable saviour of Ocular health \*

Shield against ocular infection & inflammation

## INDICATIONS
