

EXCATA

Eye Drops

10 ML

Potassium Iodide 3.3% + Sodium Chloride 0.83% + Calcium Chloride 1% Eye Drop

T10
EXC

Prevents the early formation of cataract

- ⚡ The Potassium may reduce corneal oedema by supporting glycolysis & metabolic activity.
- ⚡ Prevents corneal damage from secondary oedema.
- ⚡ Aids in the resorption of various pathological deposits.
- ⚡ Ideal combination for various haemorrhage.

Well tolerated & demonstrates improvement in the visual acuity, reduces corneal thickness and postoperative inflammation.

* Care & convenience together *

To combat
