

NorthovilTM 5

Norethisterone Tablets 5mg

In the management of menstrual irregularities

- A synthetic hormone similar to the naturally occurring sex hormone, progesterone.
- Norethisterone seems to be superior compared to other progesterone to provide optimum bleeding control & endometrial protection
- Work by acting on receptors in the body to mimic or exaggerate the effects of the natural hormone, progesterone.

Relax In that painful days

Indications

- Prevent abnormal or unexpected bleeding from the uterus
- Certain types of breast cancer
- Symptoms of pre-menstrual syndrome
- Painful or heavy periods
