

Making Pregnancy **Safer & Better**

NovugestTM 200 Progesterone Injection 100

Injection

- Progesterone also known as P4 is a C-21 steroid hormone involved in the female menstrual cycle, pregnancy (supports gestation) and embryogenesis of humans and other species. Progesterone belongs to a class of hormones called progestogens, and is the major naturally occurring human progestogen, it should not be confused with progestins, which are synthetically produced progestogens
- Has better bioavailability and fewer side effects than natural progesterone, and is convenient to administer
- Appears to be safe and effective alternative to synthetic and natural progesterone formulations for variety of clinical and research applications

Indications

- ☑ Habitual and threatened abortions
- ☑ Infertility due to corpus luteum insufficiency
- ☑ Hormonal therapy
- ☑ Assisted reproduction
- ☑ Primary and secondary amenorrhea

Born for both
Mother & child
