Injection

ACETYLCYSTEINE INJECTION BP 200MG

The Powerful Mucolytic with versatile Activity

- N-Acetylcysteine improves the pulmonary defense mechanism, phagocytic capacity of alveolar macrophages and so protects lungs from inflammation via its direct-antioxidant property and indirectly as a precursor of glutathione synthesis.
- Increases the Mucociliary Clearance
- Mucoregulating and a Bronchodilator drug
- An Airway Mucus Regulator with anti-inflammatory action
- Significant Improvement in Lungs functions
- Leads to Mucoregulation, stimulation of Bronchoalveolar clearance
- Leads to Mucoregulation, stimulation of Bronchoalveolar clearance with anti-inflammatory anti-reactive effect
