

WHEN THE SPEED OR
DIRECTION OF GUT
TRANSIT GETS ALTERED...

IN

- GERD
- ULCER DYSPEPSIA
- FUNCTIONAL DYSPEPSIA
- DIABETIC GASTRO PARESIS

RABOLIK

LSR
Capsules

Rabeprazole Sodium I.P. 20mg (E.C) + Levosulpride (S.R) 75mg

CORRECTS DYSMOTILITY SYMPTOMS

Superior acid reflux control by anti-emetic and prokinetic effects
Excellent dissolution of Rabeprazole and levosulpiride in intestine
stomach respectively

- ★ Decreases frequency and intensity of individual symptoms like pain / discomfort, fullness, bloating, early satiety, pyrosis, regurgitation and nausea and vomiting
- ★ Significant reduction in gastric emptying time by 96 minutes¹
 - ★ All symptoms almost disappear by the 30th day
 - ★ Better overall clinical improvement than domperidone

SPECIFIC APPROACH FOR BETTER MOTILITY
