**Tryptocet**  
*...Bring back the joy of life.*

To Improve  
**Mood & Felling** of well being **Relieve**  
**Anxiety** & Tension Increase **Energy**  
**level.**

- ✓ Amitriptyline is in the tricyclic antidepressant (TCA) drug classification and acts by blocking the reuptake of both serotonin and norepinephrine neurotransmitters.
- ✓ Chronic treatment with amitriptyline desensitizes presynaptic autoreceptors and heteroreceptors, producing long-lasting changes in monoaminergic neurotransmission

## INDICATION

- Restless & Sleep Disturbances
- Migraine Heahache • Anxiety
- Agitation
