

 WinOvulation™

Primepill™ Tablets

Drospirenone 3mg + Ethinylestradiol 0.03mg

An Invention Beyond Oral Contraceptive Alone

- This medicine also causes changes in your cervical mucus and uterine lining, making it harder for sperm to reach the uterus and harder for a fertilized egg to attach to the uterus.
- **Drospirenone and Ethinylestradiol** in combination suppress the release of follicle stimulating hormone (FSH) and luteinizing hormone (LH), preventing ovulation.
- This medicine combines two types of female hormones, an estrogen and a progestin. It is used to prevent ovulation and pregnancy
- **Drospirenone and Ethinylestradiol** is a combination birth control pill containing female hormones that prevent ovulation (the release of an egg from an ovary).

Now Start each day without Hesitation & Fear...
