BILASTINE

- ✓ A novel new generation anti-histamine that is highly selective for the H1 histamine receptor. (World allergy organ J 2008 sep ;1(9):145-155)
 - ✓ Effective and tolerable in patient with perennial allergic rhinitis. (Attergol int 2017 Jan;66(1):97-105)
 - ✓ Rapid onset & prolonged duration of action.
 - ✓ Exhibits elimination half-life of 14.5 hours.
 - ✓ Well tolerated and safe to use in geriatrics.
- In Urticaria :
- ✓ Bilastin ensures significantly greater inhibition of the wheal and flare response than cetirizine or placebo.
