# Ebavamp<sup>TM</sup> M Tablets

Ebastine I.P. 10mg + Montelukast Sodium I.P.10mg

## Ebastine

- ✿ Ebastine have advantages over cetirizine 10 mg, in terms of a reduced time to achieve maximal efficacy and a superior level of efficacy in patients with more severe symptoms.
- ✿ Ebastine 10 or 20mg (79 to 85%) is more effective than loratadine 10mg (65 to 66%) for the treatment of PAR (Perennial allergic rhinitis).
- ✿ Ebastine treatment increasing IFN-gamma production which is indicator of clinical immunological improvement.

## Montelukast Sodium

- ✿ Montelukast is a leukotriene antagonist
- ✿ It blocks the action of leukotriene, a chemical messenger. This reduces inflammation (swelling) in the airways to prevent asthma and relieve symptoms of allergies.

Allergic Rhinitis

Idiopathic Chronic Urticaria

Asthma

Runny Nose
