

Win over the complications during pregnancy

FIBOGEST[®] H

INJECTION

Hydroxyprogesterone Caproate 500/250mg

500

250

For healthier tomorrow...

- Reduces the incidence of PTD(Pre-term delivery) in Pluriparous (Producing several young at a single birth) women with a previous history of PTD or with recurrent abortion.
- As well as in nulliparous (Never having given birth to a child) women with an actual risk; namely in the presence of a silent cervical shortening.
- Safe for the fetus when administered in the second and third trimesters.
- Blunts hypertension associated with RUPP (Reduction in uteroplacental perfusion).

Indications

- ✓ Threatened abortion
- ✓ Amenorrhea
- ✓ Prevention of Preterm Delivery
- ✓ Dysfunctional uterine bleeding
- ✓ Preterm Birth Risk
