Cream

Vilderm NM

Clobetasol Propionate I.P. 0.05% + Neomycin Sulphate I.P. 0.5% + Miconazole Nitrate I.P. 2.00%

Cream

Ofloxacin

It is an antibiotic that kills bacteria by preventing them from reproducing and repairing themselves.

Ornidazole

It is also an antibiotic that kills other infectious microorganisms in addition to bacteria by damaging the DNA.

Itraconazole

It is an antifungal medication. It kills and stops the growth of the fungi by destroying its cell membrane, thereby treating your skin infection.

Ketoconazole :

It kills fungi by destroying the fungal cell membrane & treats your infections.

Clobetasol Propionate :

Broad spectrum & fungal agent Effective in condition with Tinea Pedis with 80% cure rate

Neomycin Sulphate :

Well accepted antibacterial agent

Tolnaftate :

It is an antifungal medication.

Iodochlorohydroxyquinoline :

It acts by interacting with DNA synthesis thus killing the fungi.

Jock Itch

Infected Eczema
