TABLETS

Tendoclass[®] Forte

Collagen Peptide Type-II 40mg + Sodium Hyaluronate 30mg + Chondroitin Sulfate Sodium 200mg + Vitamin C 12.5mg + L-Arginine 500mg

TABLETS

- ✓ Collagen is a major constituent of bone cartilage and loss of collagen leads to cartilage damage and osteoarthritis. Collagen peptides supplementation has important role in preventing and treating Osteoarthritis because it regenerates cartilage and provides strength in load bearing bones therefore improves flexibility of joints. Collagen based nutritional supplement have a very good role to play in osteoarthritis.
- ✓ Vitamin C is a water-soluble vitamin with antioxidant activity required by the body to make collagen.
- ✓ Sodium Hyaluronate and Chondroitin reduces the inflammation associated with the Osteoarthritis.
- ✓ L-arginine plays a role in building protein. The body can use the protein to help build muscle and rebuild tissue. In addition to building protein, L-arginine releases nitric oxide in the blood which acts to widen blood vessels in the blood stream, which may help aid certain circulatory conditions.

Increases Lubrication

Reduces Stiffness

Increases Cartilage Strength

Increases Flexibility & Mobility
