

The Comprehensive **Liver**  
Specified Therapy

# Hepavil 400

S-Adenosyl-L-Methionine 400mg Tablets

- ✓ Adenosine is investigated for its role in the liver due to steatohepatitis (Fatty Liver) being associated with reduced rates of the one-carbon cycle and subsequent methylation in the liver.
- ✓ In patients with cirrhosis of the liver Adenosine daily was able to reduce the rate of liver transplantation or death from cirrhosis from 29% to 12% more benefit was noted in persons with less pathology of cirrhosis compared to late-stage cirrhosis.
- ✓ A substantial amount of evidence suggested that Adenosine can be effective treatment of Osteoarthritis, the wear and tear type of arthritis that many people develop as they get older.

## Indications

**Cholestasis**

**Hepatotoxicity**

**Osteoarthritis**

**Alcoholic Liver Disease**
