LEVOCETIRIZINE:

- Potent antihistaminic and anti-inflammatory agent.
- Free from sedative effects.
- Provide better protection than desloratadine against nasal allergy.

MONTELUKAST:

- Potent, specific leukotriene receptor antagonist.
- Relieves the stuffy, runny nose & sneezing caused by allergies both seasonal & perennial.

AMBROXOL:

- Mucolytic agent that decreases mucus viscosity.
- Reduces difficult breathing & allow re-establishment of bronchioles and alveoli.
