- Methylcobalamin is a cobalomin, a form of vitamin B12.
- Vitamin B12 is important for the brain and nerves, and for the production of red blood cells.
- Methylcobalamin is sometimes used in people with pernicious anemia, diabetes and Other Conditions.
- A precursor of pyridoxal, which functions in the metabolism of carbohydrates, proteins and fats.
- Required for the balancing of hormonal changes in women.
- It is also required for the proper growth and development of the brain, nerves, skin and many other parts of the body.
- Nicotinamide (NAM) is a form of vitamin B3. It is promoted as an anti-aging supplement because it boosts your body's levels of MID+, which acts as fuel for many key biological processes.

Keeps Nerve Conduction active & Healthy

Peripheral Neuropathy

Diabetic & Alcoholic Neuropathy

Drug-Induced Neuropathy

Lumbago & Entrapment Neuropathy
