

Keep safe from nausea & vomiting...

Vonxit

Ondansetron HCL I.P. 2mg Drop

In Nausea & Vomiting Due To:

Chemotherapy

Gastric Dysmotility

Radiotherapy

Morning Sickness

- A potent, highly selective 5-HT₃ receptor-antagonist for control of nausea and vomiting.
- An effective first-line antiemetic in children undergoing chemotherapy, radiotherapy and surgery.
- More effective and better tolerated than antidopaminergic antiemetics.
- Well tolerated even in children, rarely necessitating treatment withdrawal.
