**Nausea**

**Indigestion**

**Heartburn**

**Morning Sickness**

**Acid Reflux & Heartburn Relief**

### Sodium Alginate

- Provide an alternative, non-systemic, barrier mode of action in the treatment of GERD.
- Has extensive prevention of acid exposure in the oesophagus compared with other treatments during the first hour.
- The first-line treatment for heartburn.

### Calcium Carbonate

- Neutralizes gastric acid to provide fast relief from indigestion & heartburn.

### Sodium Carbonate

- Used to relieve heartburn, sour stomach or acid indigestion by neutralizing excess stomach acid.
