# CRITMINO IV<sup>TM</sup> INFUSION

Nutritive Infusion (Pure Crystalline Amino Acids I.V. Infusion)

- Provides a combination of essential and non-essential amino acids
- Majorly used in Intrauterine growth restriction (IUGR) refers to the poor growth of a baby while in the mother's womb during pregnancy.
- Useful in Oligohydramnios.
- It is suggested that for idiopathic Oligohydramnios intravenous amino acid infusion may prove useful in reducing maternal morbidity and perinatal mortality and morbidity and improving pregnancy outcome in developing countries.
