

When Migraine is disturbing Normal Activities...

Coolgrain™

Ergotamine Tartrate 1mg + Caffeine 100mg + Paracetamol 250mg + Prochlorperazine 2.5mg

- ✓ **Ergotamine Tartrate** - Ergot Alkaloid
An alpha-1 selective adrenergic agonist vasoconstrictor FDA approved to terminate or prevent vascular headaches such as migraines, variations of migraines, or cluster headaches.
- ✓ **Caffeine** - An analgesic, antipyretic drug
Used in combination caffeine enhances the absorption and therapeutic efficacy of ergotamine tartrate.
- ✓ **Paracetamol** - An analgesic, antipyretic drug
Acts by inhibiting the enzyme cyclooxygenase (COX) and has a high affinity for COX-2
- ✓ **Prochlorperazine** - Potent Antiemetic
Relieves nausea and vomiting which usually occurs at the peak of headache.

INDICATION

- To treat and prevent migraine.
- Acute arthritic flare ● Gynecological pain
- Used to prevent and treat migraine headaches.
