

*Disturb The Digestive Normalcy*

# Vilzyme P

Pancreatin I.P. 175mg + Simethicone I.P. 50mg +  
Activated Charcoal 50mg Tablets

## Pancreatin

- ✓ Cystic fibrosis or ongoing swelling are two of the conditions that can cause the pancreas to function poorly.
- ✓ Pancreatin is used to treat digestion problems that result when the pancreas has been removed or is not working well.

## Simethicone

- ✓ Used to relieve symptoms of extra gas such as belching bloating and feeling of pressure/discomfort in the stomach/gut. Simethicone helps break up gas bubbles in the gut.

## Activated Charcoal

- ✓ Used to treat poisoning, reduce phenytoin levels, Reduce intestinal gas, lower cholesterol levels, prevent diarrhea caused by the cancer drug irinotecan, reduce phosphate levels in dialysis, prevent hangover, calm upset stomach and treat bile flow problems.

## Indications

Flatulence

Indigestion

Hypoproteinemia

Functional Dyspepsia
